DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, are drawn to a system for recording and playing back a transport stream transmitted by a digital broadcast, classified in class 386, subclass 46.
- II. Claims 17-19, are drawn to a playback method in a digital video record/playback apparatus, classified in class 386, and subclass 68.

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, **subcombination I** has separate utility such as it allows a VBV buffer configured to temporarily store the extracted ES data..... and has a decoder configured to adjust DTS according to the predetermined playback mode of the output control unit, the decoder configured to control a decoding time point by comparing the adjusted DTS to an STC count value and **decoding the ES data outputted from the VBV buffer**, and **sub combination II** has a separate utility such as it has a step for storing transport packets of a selected program..... and a step of decoding to output picture data of the selected program by controlling a decoding time point by comparing a value of the adjusted DTS to a value of the incremented or decremented STC count **and by referring to the picture information according to the trick play mode**. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ASHER KHAN whose telephone number is (571)270-5203. The examiner can normally be reached on 9:00 AM to 5:00 PM.
